### I. In A Small Cathedral among the Pope and Priests

First there is a pious wish, which then is to be in monastic life which is also a mastery over the theological names of disciplines - it is mastered in a measured progress - imagine I was walking Mizra said to his friend and everything is just that - not just the dimensions of things but also the development of things. I have one Kabbalism about walking and places and names and houses, another about living and dining and customs like money. A third logic shoots off he is directing cinema and a fourth logic on squares in psychoanalysis and like that knowledge is all a walk.

As Mizra and his friend walked away from the cathedral they kept talking about a walk, about its dimensions - even the problem of mysticism and all the aspects of trees and types of trees and branches and spiritual fulfillment in the simple progress of life, that nobody knew either simplicity or banking, both of which is impossible.

So then Alaine said to Mizra what about the nature of things in Lucretius isn't that special? I meant of course many things of that kind Mizra said to him, many things - I mean if the structure of history was perceived we would learn it in space first and then get into the mysticism of space, this inert matter of bound space where the precinct is the Church.

They kept walking the joke goes.

### II. In a small Office - In the University at the Library

In fact Mizra was known to keep flowing on topics as arcane as chemistry and its bound up things which also meant medicine and drugs, pharmaceuticals where all this goes. But he can also be about detective fiction - its themes and concentric worlds where the sequence of history is better as fictional - I call this the beauty of modernism, when the sequence becomes fictional in literature and cinema but especially writing a novel - that dense meditation on Kabbalism comes true, that in fact it is a fictional narrative which takes into account the whole future and all its developments in a single walk in Ulysses which I claim this is like, this life is like.

A joke goes that Ulysses means modernity and its freedoms in fact.

### III. Quran, Torah Gospel and Science

In fact Mizra was drunk - he explained all of it as astrology.
